

SOCIAL RESPONSIBILITY POLICY

Allog Group's ethical principle is to value the community in which it operates, providing opportunities for work and income generation, social participation, and respect for the culture where it is established or with which it relates.

We continuously seek to improve our Social Responsibility Management System, through actions that make a difference in the daily lives of our employees and the community of which we are a part.

Investments are made in projects and actions focused on health, education and sports, prioritizing children and adolescents, through the Municipal Tax Incentive Law and projects collected from institutions in the cities where the organization has units.

Projects are analyzed by the Social Responsibility department considering pre-defined criteria.
